

## Sanitary Sound Attenuator - SOUNDICIP™

Niro has developed a Sanitary Sound Attenuator with built-in CIP'able baffle elements, which can withstand normally used CIP cleaning liquids.

The SOUNDICIP™ consists of:

- Attenuator housing
- Baffles of liquid resistant material
- Baffle carriers with built-in CIP equipment

The sound attenuation is 10-15 dB depending on site conditions.

### Advantages

The advantages of installing the SOUNDICIP™ in the spray dryer exhaust system are:

- Installation direct on the roof
- Connected to automatic CIP system
- Easy inspection and maintenance
- Long lifetime of baffle material
